Broom Corn

Any land that will grow Corn is adapted to Broom Corn. When the ground is thoroughly warm plant in 3½ foot rows, thinning out to 8 to 10 inches in the row, and cultivate like corn. Cut when the seeds are at the dough stage. Six lbs. plants an acre.

Standard Evergreen—10 to 12 feet tall and yields a bush with long, straight fiber without heavy center stems and free from crooked brush. 1 lb. 20c; 5 lbs. 75c. Not postpaid.

Buckwheat

Japanese—Pk. 35c; Bu. \$1.25; 5 Bu. \$1.15 per Bu.

DIRECTIONS FOR ORDERING

By carefully observing the following instructions, mistakes and misunderstandings will be very largely avoided.

We pay the Postage on all Vegetable and Flower Seeds in this list, except where otherwise specified. Field Seeds and Supplies are priced F. O. B. Harrisonburg, Va.; if by mail add postage. 8c first pound and 1c for each additional pound. We guarantee safe delivery of the goods to your home.

Be sure to sign your Name, Post Office, Rural Route, and State on every order. Tell us your nearest express office if your order is to be sent by express. Write plainly.

If C. O. D., shipment is desired, one-fourth of the amount of the order must accompany the order. No plants shipped C. O. D.

ALL FARMERS AND GARDNERS OF EXPERIENCE know that success with seeds depends largely on weather conditions and proper cultivation, so in accordance with the universal custom of the trade THE WETSEL SEED CO., INC., gives no warranty, expressed or implied, as to the description, quality, productiveness, or any other matter, of any seeds, bulbs, plants, or roots they send out, and they will not be in any way responsible for the crop.

Field Corn

(56 lbs. Bu.)

(Selected and Tested. Price subject to change).

Clarinda Big Perfection—This is the largest eared and heaviest producer of all our open field pollinated yellow varieties. Big thick ears with large kernels. Deep golden color. Broad thick deep grains. Large strong germ. Vigorous grower. Maturity around 110 to 115 days. We don't believe there is another variety to equal it. If you want to show you neighbors how to grow a real crop of corn plant some Big Perfection. (This description furnished by the Iowa Producer. The seed we are offering was grown successfully in Rockingham County the past season.) \$2.00 per Bu. (Our supply is limited)

Bloody Butcher—In recent years this variety has become very popular because of its yielding qualities and its ability to produce a crop under adverse conditions. Kernels speckled red and yellow. 1 pk. 50c; 1 Bu. \$1.75; 5 Bu. \$1.70 Bu.

Boone or Johnson County—A fine white dent variety with ears averaging 10 inches in length and 7½ to 8 inches in circumference with 18 to 20 rows. Matures in 110 to 120 days. 1 pk. 50c; 1 Bu. \$1.75; 5 Bu. \$1.70 Bu.

Early Massodent—Sometimes called White-Cap. Ears large, grains rather deep, pale yellow on cob, but shows up as a rich yellow when shelled. Medium fodder, fine for poor land. 1 pk. 50c; 1 Bu. \$1.75; 5 Bu. \$1.70 Bu.

Golden Make Quick—An early yellow corn with a small cob which produces two ears to the stalk. The ear is of good size but cob is small and red, fairly deep grained and of a beautiful deep yellow. Stalk is medium sized and will mature a crop in less than a 100 days. Virginia-grown seed. 50c per gal; \$3.00 per bu.

Lancaster Sure Crop—This variety has given excellent results the past few years especially on thin land. Ears 10 to 14 inches long with 14 to 16 rows of yellow broad grains. Season 90 to 110 days. 1 pk. 50c; 1 Bu. \$1.75; 5 Bu. \$1.70 Bu.

Reid's Yellow Dent—One of the most popular yellow dent varieties. Ears average 9 to 11 inches in length; deep rich, golden yellow kernels. Matures in 115 days. 1 pk. 50c; 1 Bu. \$1.75; 5 Bu. \$1.70 Bu.

Certified Reid's Yellow Dent. Bu. \$2.00; 5 Bu. \$1.95 per Bu.

Ensilage Corn

Blue Ridge—A selection from the Pamunkey Ensilage Corn but about ten days earlier. This Corn has been used in the Valley and has been proven to be an excellent variety for this section. 1 pk. 60c; 1 Bu. \$2.20; 5 Bu. \$2.20 Bu.

Eureka—A double purpose Corn, being a first-class ensilage Corn and can be used as a field Corn. It is tall and leafy, 12 to 15 feet high, with an enormous growth of fodder. 1 pk. 50c; 1 Bu. \$2.25; 5 Bu. \$2.20 Bu.

Pamunkey—The heaviest producer of all ensilage Corn. It is of strong and vigorous growth, attaining a height of 13 to 15 feet, yielding an unusually heavy growth of fodder, and usually bears two ears to the stalk. The ears 10 to 12 inches long, 2¼ to 2½ inches in diameter, with a good depth of grain. 1 pk. 60c; 1 Bu. \$2.25; 5 Bu. \$2.20 Bu.

Virginia—This variety is more on the type of ordinary field Corn, however it makes a large growth of broad, thick, succulent fodder and is a fine ensilage Corn. 1 pk. 55c; 1 Bu. \$2.00; 5 Bu. \$1.90.

Lespedeza Sericea

A perennial, once started will stand indefinitely—very hardy and drought resistant. Thrives on thin acid soil. Very leafy and a heavy seeder. Will make two cuttings the first year. A heavy and deep rooted system. Plant in Spring after danger of killing frost is about 15 lbs. per acre broadcasted like Alfalfa. Cover about eight inch. Inoculate using NITRAGIN inoculant.

Scarified Seed

25c lb. 10 lbs. \$2.40; 100 lbs. \$21.00

Lespedeza Korean

(Annual)

A legume that will grow in acid soil and on thin worn-out lands. Very drought resistant. Can be sown without soil preparation. Will reseed and come from year to year. Should be in every pasture. Inoculate, using NITRAGIN inoculation. High Grade Tenn.-Grown Seed. 9c lb; \$8.00 per 100 lbs. Seed showing two Dodder per oz. 1c per lb. less

Tenn. Cultivated Millet

Millet

Tennessee Cultivated—(Round Seed). Withstands drought better than all other varieties. It is used as a Summer hay crop and should be sown thickly and cut when the heads are in bloom, never allowing it to get old or seed. Very useful for cleaning rich, foul lands of weeds as its quick, abundant, growth smothers weeds. Sow one bushel per acre in May, June or July. Two crops can be seeded the same season, if desired. An ideal crop to sow with Cow Peas. Ask For Prices.

Jumbo Peanuts

Valencia—A large Peanut containing more nuts than the common varieties. The pods are large, well filled usually containing three or four nuts, and of handsome appearance. 15c per lb.; 5 lbs. 65c. Not Postpaid.

Improved Virginia Jumbo—This excellent variety yields uniform, large, bright Peanuts of the running type and will produce better crops with less pops and a better appearance than most varieties. 15c per lb.; 5 lbs. 60c. Not Postpaid.

Oats

Fulgham—A splendid variety of the rust proof type. It is earlier than either the Appler or Bancroft and a heavier yielder. One of the best varieties for Spring planting. 1 Bu. 80c; 10 Bu. 75c; per Bu.

Lee Cold Proof—This is a winter Oats although it is also recommended for Spring planting. Our Winters in the Valley are too uncertain to recommend any Winter Oats for Fall planting. It makes a very leafy growth, fine for hay, and produces as much grain as any other variety. 1 Bu. \$1.00; 5 Bu. 95c Bu.

Swedish Select Oats—An extra heavy plump yielding quality much preferred by cattle and horse breeders. Highly recommended for Virginia and West Virginia. It makes especially good crops on both light and heavy soil. Bu. 70c; 10 Bu. 65c per bu.

Soy Beans

CULTURE—For hay broadcast 1½ bushels per acre, for seed 1 bushel. Cow Peas and Sow Beans should not be sown in Virginia until the later part of May or first of June.

Care—If a crust forms on the land before the Soy Beans come up, break it up with a harrow. This will prevent what is commonly call "breaking their necks."

Black (Medium) 2.00 1.95 1.90
Whippoorwill (Grey) 2.25 2.20 2.15

Sugar Cane

Sugar Drip—It makes a large, juicy and succulent growth. Yielding about 65 per cent of the weight of the cane in juice when extracted by a good farm mill; a stronger mill should extract as much as 75 to 80 per cent. Well adapted for Virginia. 1 lb. 15c; 5 lbs. 60c. Not postpaid.

Early Orange—Another excellent Cane for both sorghum and forage crop. 1 lb. 15c; 5 lbs. 60c. Not postpaid.

Rape Seed

DWARF ESSEX

This crop is very highly recommended for cattle, sheep, hogs and poultry. Sow in early Spring 3 to 5 pounds per acre in drills, or 8 to 10 pounds per acre broadcast. Also an excellent green to use on the table.

Lb. 10c; 10 lbs. 8c per lb.; 25 lbs. 7c per lb.; 100 lbs. 6c per lb. Not postpaid.

Hairy Vetch

CULTURE—Vetch may be sown as early as the ground will permit in the Spring, at the rate of 15 pounds to the acre with one bushel of Oats to hold it up. May be sown same way in Fall, only using Winter Rye in place of Oats.

Vetch is a wonderful land improver. The Oats and Rye hold the Vetch up, and improve the quality of hay. Lb. 13c; 50 lbs. and up 12c per lb. Not postpaid.
